I've had a really good time playing this. I heard about the game because it's made by a local developer. Each game is really different, and they're very fast-paced. Gameplay is really solid, mechanics for each game are well thought out, but the visuals could use a bit of touch-up. I personally like the minimalistic approach, but a little update to the graphics could be good.

Overall, the experience is enjoyable, especially with a few friends that have a bit of a competitive side.. I've had a really good time playing this.
